

Function/Roles	Max	Client	Selfmade	Employee	Part-Time employee	Notes
New client registration	✓	✗	✗	✗	✗	Addition of company name, registered office address, email, bank details, telephone, note, VAT number
New order registration	✓	✓ (+ see all)	✓	✓	✗	According to the price list, it is automatically filled in into a new invoice (or work in progress) and into the "Reparatur list" export, a folder is created in which the whole process can be viewed in the archive. /Nr./PROGRAM/PRIO Y-N / NOTES / DATE
Registration of the "washing" process (who washes)	✓	✗ (just sees it started)	✓	✓	✗	Profit (Max and Washer) and Cost Counting (Max) begins
Assigning a washed caravan to a cleaning worker	✓	✗ (just sees it started)	✗	✗	✗	The privilege of determining preferably who gets a caravan for cleaning after washing (Max decide first)
Registration of the "disassembly" process (preparation before cleaning)	✓	✗ (just sees it started)	✓	✓	✗	What is being dismantled? Lines to complete. After this point, it is possible to freely choose who wants to clean, priority notice After a while Max will receive a warning and they can choose the caravan they want to clean and it will be shown on their Dashboard which is assigned for cleaning
Possibility to insert photos (argumentation of "disassembly")	✓	✗ (can already see photos)	✓	✓	✗	For each position (line) the possibility to insert 1-2 photos of what was dismantled. Possibility of chat, ask if disassembly is needed (preparation before cleaning)
Possibility to record the time of "disassembly"	✓	✗ (see times)	✓	✓	✗	Each position (row) different operation = different time. The calculation of profits (Max and employee) and costs (Client and Max) continues. Only Max has the "time reversal" function
Possibility to choose a prepared piece ("I want to clean")	✓	✗	✓	✓	✓	Max approval required (Max notifies)
Program A:B:C control (agreement / disagreement)	✓	✗ (only sees the status of consent)	✓	✓	✓	If disagreement, approval required from Max (notification will come to Max) A:B:C
Possibility to insert photos of situation "BEFORE" (this option only if you do not agree with a program)	✓	✗ (has the opportunity to view photos why we disagreed)	✓	✓	✓	Important comment: "Toilet, shower, refrigerator, stove, oven are important for photography, for argumentation". Everyone and the client see the change of the program.
Cleaning start registration	✓	✗ (just sees it started)	✓	✓	✓	Here begins to clean up who started when and when.
Max Price List	✓	✗	✓	✗	✓	Who sees the Price List that pays Max for services (for work and services)
Client Price List	✓	✓	✗	✗	✗	Who sees the Price List that is agreed with the client (final prices)
Creating invoices and automatically filling in invoicing items (orders)	✓	✗	✓	✗	✗	One order = One billing item, including all extra work. Ability to create, export invoices, print, edit
DashBoard: who sees the orders and the Client Price List and how much they cost	✓	✓	✗	✗	✗	Example: Invoice Nr. 88.: TYPE / MODEL / No. / PROGRAM / PRIO Y-N / NOTES / DATES 330 + 65.75 + 40 = 435.75 \$ (this is information for the client program + extracost + polishing) this items has a highlighted cost for the client
DashBoard: who sees the orders and the Max Price List and how much the role has earned	✓	✗	✓	✗	✓	Example Washer see: Invoice Nr. 88.: TYPE / MODEL / No. / PROGRAM / PRIO Y-N / NOTES / DATES 40 + 18,5 + 20 = 88,5 \$ (this is information for Washer washing + extracost + polishing) this items is highlighted
"Extra costs" process registration (possibility to create work operations beyond the program)	✓	✗ (see process)	✓	✓	✓	A VERY IMPORTANT STEP BETWEEN CLEANING AND FINISHING: Removal of non-original stickers, glue, hooks, paint decontamination, silicone, disassembly of parts and furniture, assembly of parts and furniture, cabin polishing, additional polishing, etc. (Possibility to create extra repair operations).
Possibility to insert photos (argumentation of "extra costs")	✓	✗ (see photos)	✓	✓	✓	For each position (line) the possibility to insert several photos of what was done extra. Possibility of chat, ask if you need to do some extra do / not do
Possibility to record the time of "extra costs"	✓	✗ (see times)	✓	✓	✓	Each position (row) different operation = different time. The calculation of profits (Max and employee) and costs (Client and Max) continues. Everyone except the Client has the "time reversal" function.
After entering the time for each operation, you can enter how much extra material was used	✓	✗ (see material)	✓	✓	✓	Especially for operations such as removing glue and stickers (Orange KOCH Power = 1 liter = 35 euros) "how much was consumed ml?" Automatic calculation of material costs (paid by the client) and entry of this value as "Extra costs" for the Client in Max invoice. Client pays for this extra.
COMPLETED WORK "Quality control"	✓	✗ (only information that quality is now being checked)	✗	✓ (only if approved by Max)	✗	Checks Max, the ability to assign employees. Max must always be the last person in the caravan, do not let anyone through this point like to complete the job, this step is approved by Max.
Export information (everyone sees what they have to see...)	✓	✓	✓	✓	✓	End... now the order is saved wherever it is to be saved and we can return to it at any time in the archives. But everyone sees only what they have to see....
